**These state-specific figures are derived from the 2018 NCI SBIR/STTR Economic Impact Study analysis, which assessed the impact of Phase II grant awards initiated from FY1998-FY2010 and the economic results of these investments up to 2018. NCI continues to provide SBIR/STTR grant awards in Colorado: between FY1998 and FY2024, the NCI SBIR Development Center distributed \$63.3M in funding across all grants to oncology-focused small businesses in the state.*

Success story:

ADVANCED RNA TECHNOLOGIES, LLC

Advanced RNA Technologies used SBIR funding to develop self-deliverable RNAi compounds that increase immune effector cell function to spot and attack tumor cells more efficiently. These compounds are available for research use from Advirna.

The NCI SBIR Development Center offers information sessions on funding opportunities and resources for cancer technology startups. If your state is interested in hosting, please reach out to ncisbir@mail.nih.gov.
